

STREAM TEAM MONITORING

Join over 60 water quality monitors who are passionate about keeping our local streams and habitats healthy.

Stream Team Goals Include:

- Watershed education
- Involve community in citizen science monitoring
- Increase available water quality data
- Identify areas of concern

Pierce Conservation District's Stream Team members have been providing water quality data to the local community since 1994.

By Joining Stream Team, YOU Will:

- Help monitor one of many streams in Pierce County
- Record data on stream and habitat health
- Learn how human activity and pollution affects native species
- Make a difference in your local environment and community

To sign up for a Stream Team training, contact Belinda Paterno by phone or email.
